

ElmenGuideElmendorf Tear Tester

The ElmenGuide, also known as the Pendulum Tearing Tester, do the test by using a pendulum tearing method. The pendulum falls from a certain starting height, converts all potential energy into kinetic energy, cuts a slit on the fabric, and then measures the force required for the fabric to tear to a specified length, which can be used to calculate the fabric's tear resistance.

It is mainly suitable for woven fabrics, also for other textiles produced by other technologies, such as non-woven fabrics. However, it is not suitable for knitted fabrics, woven elastic fabrics, and fabrics in which the tearing direction will change during testing.

ElmenGuideElmendorf Tear Tester

 The innovative balance pendulum plate design, achieves a higher level of testing accuracy

The pendulum arm of ElmenGuide is specially designed, and the center of gravity of the entire pendulum arm coincides with the rotation center when no weights are attached. This results in higher accuracy and reliability of the equipment.

Smart instrument

Can be connected through Wi-Fi with SmarTexLab App installed in the smart phones, set parameters, monitor the test status, receive equipment warning reminders, replenishment reminders, etc., and share test results with one click.

Automatic recognition of weights

The machine can automatically recognize the weight attached and adjust to the corresponding range.

Humanized design, for more safety

The double-button switch design prevents accidents and is more user-friendly for testers.

Precise manufacturing and stable operation

The fixture rotates flexibly and the loss of empty pendulum is minimal. Multiple measurement units (N, cN, gf, cP) to choose from. In addition, ElmenGuide has a precise appearance design, with an aluminum alloy hard oxidation surface that is sleek, durable, and easy to clean. The trapezoidal chassis is more stable, and the seven-inch color touch screen is simple and easy to use.
